

DOCKER

The screenshot shows the Docker Hub interface for the repository `uifd/ui-for-docker`. The page header includes the Docker Hub logo, a search bar, and navigation links. The repository page shows the repository name, a star icon, and a note that the repository is deprecated. Below this, there are tabs for 'Overview' and 'Tags'. The 'Overview' tab is active, displaying a description of the repository, its goals, and a quickstart section. A 'Docker Pull Command' box is also visible on the right side of the page.

Wasm is a fast, light alternative to Linux containers – try it out today in the [Docker+Wasm Technical Preview](#)

UI For Docker

This repo is deprecated. Development continues at: [portainer/portainer](#)

[chat](#) [on gitter](#)

UI For Docker is a web interface for the Docker Remote API. The goal is to provide a pure client side implementation so it is effortless to connect and manage docker.

Goals

- Minimal dependencies - I really want to keep this project a pure html/js app.
- Consistency - The web UI should be consistent with the commands found on the docker CLI.

Quickstart

Docker Pull Command

```
docker pull uifd/ui-for-docker
```

The screenshot shows the Docker Playground interface. On the left, there is a sidebar with a clock showing 03:54:13, a 'CLOSE SESSION' button, and a list of instances. The main area displays the details of a container named `cdtjcje3_cdtjdn91rrg008mlgj0`. The container's IP is `192.168.0.18`, and it has a memory usage of 1.39% (55.7MiB / 3.90GiB) and a CPU usage of 0.16%. The terminal output shows the command `docker pull uifd/ui-for-docker` being executed, which results in pulling the latest image from Docker Hub. The terminal also displays a warning message about the sandbox environment and the FWD team.
